

# SpraySAFE SpraySAFE

## SANITISING SAFETY TUNNEL

Sanitise mass entrance and exit points using fine mist.

*Flat packed for easy shipping!*

## SANITISING SAFETY TUNNEL

### Features:

- SS 304 sqr tube frame with opaque polycarb sheet covers on side and roof
- Plug and play unit ready to be supplied with sanitiser direct in to pump unit
- SS instrument HP mist manifold with 6 off 0.2 mm sanitising mist nozzles
- Working pressure: 70-85 kgf/cm<sup>2</sup> | suction volume: 0.9-1 L/min
- 1000 psi operating pressure for optimal misting effect using the narrowest orifice nozzles
- Nickel-plated forged brass manifold resists rust and corrosion
- Special Viton seals for use with sanitisers
- Patented internal rinse cooling design to increase pump life
- Dual bearing design to lower the heat and noise level down to 75 dB
- Automatic pressure valve controls the consistency of the pump pressure
- Dual assembly with settings for minutes and seconds to set the misting intervals
- Dual analog timer has settings for minutes and seconds to set exact intervals for misting and stopping. (The shortest spray time setting: 5 seconds, the shortest stop time setting: 15 seconds)
- Beam activated entry and auto stop

### Dimensions:

- 2000 m nozzle height
- 2300 mm roof pitch
- 970 mm wide
- 2000mm long
