

Sunshine Kids

We would like to make use of this opportunity to tell you, our parents, about the “Sunshine Kids” campaign.

Van Dyk Pharmaceuticals want parents and scholars to become aware of the importance of the use of sunscreen to prevent the increase of skin cancer. Skin cancer is a reality and not a myth anymore. South Africa features high on the list of skin cancer and melanomas. 95% of the UV radiation that reaches the earth’s surface is UVA rays. The latter is the main cause of skin cancer. The UVB rays cause sunburn and damage the epidermis of the skin. Children under the age of 18 are the most exposed to the damage of UVA and UVB rays.

Xeroderm SF40 Sunscreen is a non-greasy and moisturising sunscreen that protects the skin against harmful UVA and UVB rays. Xeroderm is one of the few sunscreens on the market that blocks both these harmful rays. Xeroderm sunscreen has been developed for South African conditions and is prescribed by top dermatologists. Xeroderm SF40 is colour and fragrance free thus making it hypo-allergenic and is therefore ideal for sensitive skin types. Twice a year Xeroderm Sunscreen is tested by MEDUNSA to ensure that the SPF factor is guaranteed.

The school management at Vaalpark Primary has decided to get involved with this campaign showing that the health of their learners is important to them. The involvement of the school plays an extremely important role in our Sunshine Kids campaign. They can assist the children to develop a habit of applying sunscreen regularly throughout the day, especially before playtime and extra mural activities. The co-operation of the school and the parents can play a vital role in making the children aware of the importance of using sunscreen to limit skin cancer.

With our Sunshine Kids campaign we afford the parents the opportunity to purchase Xeroderm SF40 directly from the manufacturer at very affordable prices. Attached is the order form which you can complete and email back to us together with your proof of payment. Your Xeroderm sunscreen will be delivered to your child at the school. If you do have any questions regarding Xeroderm sunscreen, you are more than welcome to contact me directly or visit our website.

Should we as a school get involved, we will receive 1 litre of sun screen for every 10 litres ordered. The school would like to place a 1 litre bottle in each class so that learners can utilize the cream for break and extra-mural activities. The school can’t make this campaign succeed without our parent’s support. It is nearly holidays, those that need to buy sunscreen for that purpose, can please consider purchasing this excellent sun-screen. It is all in aid of your child/children’s health. Orders and payments must be in on or before **5 October 2020**.

Please send the order form with proof of payment to:
